

Astronomy 4100, Homework # 05, 23 January 2015 (due 28 January 2015).

1. Consider two lenses with focal lengths  $f_1$  and  $f_2$  aligned along the optical axis and separated by a distance  $d$ . Calculate the combined focal length of this lens system.
2. Problem 1.8(a) from Measuring the Universe.
