

Astronomy 4100, Homework # 07, 28 January 2015 (due 4 February 2015).

1. Problem 2.3 from Measuring the Universe. Rather than follow the hint, simply assume at the wavelength in question the atmosphere limits the seeing FWHM to no smaller than 1 arcsec, which should match the size of the pixels projected on the sky.
2. Problem 2.6 from Measuring the Universe.
